European Practical Implementation Guidance for implementing BBV opt-out testing in Emergency Departments

EuroTEST
Working together for integrated testing and earlier care
Addressing Hepatitis, HIV, STIs and TB

A substantial proportion of people with HIV, hepatitis B and hepatitis C remain **undiagnosed** or are **diagnosed late**.

Optimal implementation model for BBV Opt-out testing in ED*

*ED - Emergency Departments

Use opportunity for testing **when blood samples are done anyway** for other reasons.

Emergency departments reach large numbers of **people who may not access routine healthcare** or targeted testing services.

European evidence: ED opt-out BBV testing is feasible and effective for identifying new cases and re-engaging people in care.
